

TauRIS Club Software
CS 1.3-CZ
TS 8.10-CZ / 5315

**Names etc. for race points can be entered and used in TauRIS compact+ and maXX terminals:
This manual affects the TauRIS Club Software for Windows as well as the software for TauRIS terminals.**

With this software version names, texts and co-ordinates for race points can be entered and race points names can be transferred to TauRIS terminals. This is only possible with compact+ and maXX terminals. These data can't be transferred to kompakt terminals.

For entering race points chose "Misto zavodu" in the main window of TauRIS Club Software. Use "Ukazat" of the upcoming menu. The numbers 01 to 98 are listed with the already entered names of the race points.

To enter new names use "Pridat", to change race points use "Zmenit" and to delete race points names use "Smazat". For changing or deleting any race points name one race point has to be selected / marked.

To transfer these data to TauRIS compact+ or TauRIS maXX terminals use "Kommunikace" in the main menu and click "Posli mmista zavodu (PC->Terminal)" when a TauRIS terminal is connected to the PC.

Having finished transferring race points data to the terminal race points name will appear in the display when choosing a racepoint for nomination, entry or print out and in the entry, clocking and control list right behind race points number.

To choose any race point in the terminal for nomination, entry or print out following display will appear (depending on the chosen names for each race point in the TauRIS Club Software):

```
Misto zav. : 00#  
98 Brno  
01 Praha  
02 Liberec
```

There are two possibilities to choose any race point:

1. Enter race point's number and confirm.
2. Confirm "00". The cursor will move to race point 01 (e. g. "01 Praha"). Now it is possible to scroll up and down with the arrow keys "up" and "down". To choose any race point confirm the race point which is marked by the cursor.
